SUMMARY

I'm a full-stack developer who's been in the trenches with web apps from start to finish, analyzing what's needed, designing solutions, coding them up, testing, deploying, and keeping them running smoothly. I've gotten pretty good at understanding what businesses actually need and turning that into working software. I'm a strong problem-solver who works well with teams, and I focus on building stuff that can grow and won't be a nightmare to maintain down the road.

SKILLS AND EXPERTISE

- **Backend Development:** Proficient in LAMP stack (Linux, Apache, MySQL, PHP), SilverStripe and Laravel.
- **Frontend Development:** Skilled in JavaScript, CSS, HTML5, and modern libraries like Vue and React JS.
- **Mobile Development:** Experienced in building mobile apps using React Native and Quasar mobile framework.
- **Cloud and DevOps:** Familiar with AWS for application hosting and deployment, with a foundational understanding of cloud infrastructure.

WORK EXPERIENCE

Full Stack Developer
Tile Solutions Canada
2022 - present
My responsibilities include managing of servers and services hosted on the AWS platform, enhancing existing applications by incorporating new features and modules, integrating third-party web services, modernizing legacy UIs using modern JavaScript libraries, and developing web APIs with both REST and GraphQL.

Full Stack Developer
I-River Integrated Solutions Philippines
2009 - 2022
I manage servers and services on AWS, maintain and optimize legacy code, develop new modules to enhance our in-house business applications, and implement API integrations with third-party services.

Web Developer (Part-time)
High Tide Digital New Zealand

2015 - 2020
At High Tide Digital, I have been responsible for building and maintaining a travel booking application, as well as developing websites for the company's clients utilizing the SilverStripe CMS.

Web Developer (Freelance at Upwork)
2013 - 2015
Self-employed web developer.

IT Specialist
ePLDT Ventus Philippines
2007 - 2009
Maintained IT assets and provided technical support to call center employees, including troubleshooting network, software, and hardware issues. Developed and maintained an intranet application for IT asset monitoring.
