## Relevant Experience

### Full Stack Developer, Tile Solutions – 2022 -- present

I manage servers and services on AWS, maintain and optimize legacy code, develop new modules to enhance our in-house business applications, and implement API integrations with third-party services.

### Full Stack Developer, I-river Solutions - 2009 -- 2022

My responsibilities include managing servers and services hosted on the AWS platform, upgrading existing applications by adding new features and modules, integrating third-party web services, enhancing legacy UIs with modern JavaScript libraries, and developing web APIs using REST and GraphQL.

### Web Developer, High Tide Digital - 2015 -- 2020

At High Tide Digital, my work has involved building and maintaining a travel booking application, as well as developing websites for the company's clients using the SilverStripe CMS and Framework.

### Freelance Web Developer, Upwork - 2013 -- 2015

Build Websites for Netech clients

## Selected Projects

### Tile Solutions E-commerce System

Designed and developed custom system from scratch to meet Tile Solutions complex business requirements

### Tile Solutions Warehouse App

An android application designed for warehouse staff to scan and process orders for shipping. The app helps staff to quickly track, scan, and manage items, ensuring smooth and accurate order shipping

### Tile Solutions Store App

An e-commerce mobile app developed for Tile Solutions Store. The app features product browsing, customer profiles, order tracking status, rewards points, shipping status tracking and cart checkout.
