## Relevant Experience

### Full-stack Developer, Tile Solutions – 2017 -- 2025

I designed and developed a comprehensive ERP system and e-commerce website from the ground up and maintained the system. Additionally, I manage servers and services on AWS, maintain and optimize legacy code, develop new modules to enhance the in-house business applications, and implement API endpoints and API integrations with third-party services. I have also designed and developed mobile applications for store, warehouse, and sales staff to help streamline business operations.

### Full-stack Developer, I-river Solutions - 2009 -- 2017

I was employed as a web developer at the start of my career, building websites and web applications for CHL (Canadian Hockey League) and ScoreGOLF. I spent so much time working on applications built on Zend/Laminas and Laravel MVC frameworks. The projects that I worked on included the Unemployment Tracker, ScoreGOLF's custom backend CMS, and CHL's newsletter system.

### Freelance Web Developer, High Tide Digital - 2014 -- 2020

At High Tide Digital, my work involved building and maintaining a travel booking application, as well as developing websites for the company's clients.

### Freelance Web Developer, Upwork - 2013 -- 2014

Built websites for Netech Italy clients.

## Selected Projects

### Tile Solutions ERP System

Designed and developed a custom ERP system from the ground up to meet Tile Solution's complex business requirements. The application features inventory management, POS, CRM, comprehensive reporting for sales and accounting, customer reward system, logistics and warehousing.

### Tile Solutions Warehouse App

An android application designed for warehouse staff to scan and process orders for shipping. The app helps staff to quickly track, scan, and manage items, ensuring smooth and accurate order shipping.

### Tile Solutions Store App

An e-commerce mobile app developed for Tile Solution's Store. The app features product browsing, customer profiles, order tracking and history, rewards points, shipping status tracking, and cart checkout.
